

Compasso™ Standard & Compasso™ Elite Quick Ship Changes to Product Offering

Effective February 1st, 2021 USG will be expanding the quick ship perimeter trim portfolios for both Compasso™ Standard and Compasso™ Elite to include 10" and 12" options. In addition, USG will include splice plates and DX attachment clips with all future quick ship shipments of perimeter trim. Please see your local USG sales representative for more details.

Compasso™ Standard Quick Ship Perimeter Trims Additions

USG is expanding its quick ship portfolio to include both 10" and 12" heights in ten (10) foot lengths. Quick ship lengths of perimeter trim will be offered in Flat White (050), Flat Black (205) and Silver Satin (002) colors. Perimeter trims in these sizes are manufactured from break formed Aluminum as opposed to roll formed steel. USG has also planned for color coordinated inside and outside corners to support field installations as needed.

Compasso™ Elite Quick Ship Perimeter Trims Additions

USG is expanding its quick ship portfolio to include a 10" high profile in a ten (10) foot length. Quick ship lengths of perimeter trim will be offered in Flat White (050) only. Compasso™ Elite Perimeter trims are manufactured from extruded Aluminum. USG has also planned for color coordinated inside and outside corners to support field installations as needed.

USG Quick Ship Perimeter Trims to Include Installation Accessories

All (Compasso™ Standard and Compasso™ Elite) Quick Ship perimeter trims will include splice plates and standard DX galvanized attachment clips per USG's recommended installation guidance with all future shipments of trim. Fineline/DXi, Concealed, Celebration Snap-in, Paraline, Paraline Plus and painted clips will need to be ordered separately.

Compasso™ Standard: USG recommends one (1) splice plate when joining two pieces of Compasso™ Standard perimeter trim and an attachment clip every two (2) foot on center. Therefore, in a standard carton of eight (8) pieces of trim, one would receive eight (8) splice plates and forty (40) attachment clips, which will be packaged in a single box.

Compasso™ Elite: USG recommends two (2) splice plates when joining two pieces of Compasso™ Elite perimeter trim and an attachment clip every two (2) foot on center. Therefore, in a standard carton of eight (8) pieces of trim, one would receive sixteen (16) splice plates and forty (40) attachment clips, which will be packaged in a single box.
