RE: Price Increase Effective May 1, 2010

TO: Our Valued Customer

In our previous price increase letter I had stated that indications were the domestic mills would continue to pass along price increases as raw material costs spiral upwards. In May we will be looking at our fifth steel increase since January 2010.

Sectors within the steel industry are improving, resulting in mill productivity improving every week, and their order books strengthening. Unfortunately, commercial construction activity remains challenged. We have no other option but to pay these price increases.

Due to the continuing mill increases, Super Stud Building Products will increase pricing 15% on all metal framing products and accessories effective May 1, 2010.

Super Stud will honor all job quotations in accordance with our quote policy. Please contact your sales representative to review all quotations that will expire this month.

If you have any questions, please contact your Super Stud Building Products Sales Representative.

Thank you for your business and continued support during these difficult times.

Regards,

Chris Chimera
Sales Manager
