

Spring 2010 New Products Summary

"A" Items

- **MetalWorks 3 D**
 - MetalWorks 3D is a 3 dimensional ceiling system that allows designers to create their own unique design with 2' x 2' metal panels of varying heights. Panels can be installed up or down in the grid, creating up to eight inches of dimension. Perforated and non perforated steel standard panels install on standard 9/16" Suprafine suspension.
- **Security Ceilings**
 - MetalWorks SecureLock is a security ceiling system, used to prevent individuals from leaving a space or prevent the storage of contraband in the ceiling plane.
 - We have two security levels in our offer to control access to the plenum:
 - Resist (SecureLock) 2' x 2' panels
 - Prevent (SecureLock Pus)- Plank system with varying sizes
- **Healthcare Segment Sales Tools**
 - New AIA Continuing Education Presentation "Solving Healthcare Design Challenges with Ceiling Systems"
 - "Wellness by Design"
 - New healthcare market segment brochure showcasing our portfolio of solutions
 - "Rx for Improving Patient Outcomes: Enhanced Acoustics and Aesthetics" White Paper
 - Companion to "Wellness by Design" for your customers who want more information on the rising noise levels in hospitals and their effect on patient and staff well-being
 - Outlines the ABC's of Balanced Acoustical Design plus information on the FGI Guidelines for the Design and Construction of Healthcare Facilities and the Green Guide for Health Care
 - The Web
 - Clickable brochure linked to key sources of data referenced in the brochure
 - Clickable hospital floor plan quickly takes your customers from the space in question to the recommended solutions – based on the AIA Guidelines.

Line Extensions
