Freight Surcharge Update

To offset rising fuel costs, effective March 25th, we are implementing a freight surcharge. The surcharge will be applied to all shipments for all products (Mineral Fiber, Suspension Systems and Architectural Specialties).

The fee structure will be as follows:

Full Truckloads

- Effective with shipments shipping March 25th, 2026, we will begin charging a \$350 freight surcharge fee. This fee will offset the rising fuel costs.
- This change applies for *all products* that ship in full truckload quantities.

LTL Shipments

- Effective with shipments shipping March 25th, 2026, we will begin charging a \$200 freight surcharge fee. This fee will offset the rising fuel costs.
- This change applies for *all products* that ship in less than truckload quantities.

Thank you for your support.
